### **DETAILED ACTION**

Receipt is acknowledged of the response to the restriction requirement filed 01/13/2005.

### ***Election/Restrictions***

Claims 16 and 38 withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 01/13/2005.

Applicant's election without traverse of Group I, claims 1-15, 17-37 in the reply filed on 01/13/2005 is acknowledged.

### ***Information Disclosure Statement***

The listing of references in the Search Report is not considered to be an information disclosure statement (IDS) complying with 37 CFR 1.98. 37 CFR 1.98(a)(2) requires a legible copy of: (1) each foreign patent; (2) each publication or that portion which caused it to be listed; (3) for each cited pending U.S. application, the application specification including claims, and any drawing of the application, or that portion of the application which caused it to be listed including any claims directed to that portion, unless the cited pending U.S. application is stored in the Image File Wrapper system; and (4) all other information, or that portion which caused it to be listed. In addition, each IDS must include a list of all patents, publications, applications, or other

Art Unit: 1615

information submitted for consideration by the Office (see 37 CFR 1.98(a)(1) and (b)), and MPEP § 609 subsection III. A(1) states, "the list ... must be submitted on a separate paper." Therefore, the references cited in the Search Report have not been considered. Applicant is advised that the date of submission of any item of information or any missing element(s) will be the date of submission for purposes of determining compliance with the requirements based on the time of filing the IDS, including all "statement" requirements of 37 CFR 1.97(e). See MPEP § 609 subsection III. C(1).

### ***Claim Objections***

Claim 17 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form.

Applicant has already set out that the animal is human in claim 2, from which claim 15 already depends. This does not further limit the claim. Correction is requested.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 18-37 recites the limitation "fistula" in claim 17. There is insufficient antecedent basis for this limitation in the claim.

Claims 17 and 15 do not refer to a fistula. It instead appears that claim 17 should depend upon claim 16. Correction is required.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-3, 5, 6, and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hansbrough et al. (JAMA 19/1989).

Hansbrough disclose the use of autologous fibroblasts in the treatment of burn wounds (see Abstract). Autologous keratinocytes are cultured at page 2125, third column, first full paragraph. The cells are cultured twice (see page 2126, first column, first full paragraph). The reference differs only in that the cultured cells are not injected, but instead either stapled or sutured as part of a composite graft. However, those of ordinary skill would expect similar wound healing results from the instant claims given the disclosure of Hansbrough et al. Barring a showing of criticality for administration through injection as opposed to any other form of administration, the instant method would have obvious given the disclosure of Hansbrough.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-9 are rejected under 35 U.S.C. 102(b) as being anticipated by DE 197 16 098 (DE'098).

DE'098 disclose the use of autologous fibroblasts in the treatment of wounds. Cells are taken from the same tissue being treated, cultured in the subject's serum, and used to treat an epithelial wound (see 2, lines 22-25; page 4, column 17; claims 1 and 12). The instant claims are anticipated by DE'098.

Claims 10-15, and 17 are objected to as dependent upon a rejected base claim.

Claim 16 is in condition for allowance.

Van Bossuyt is cited for the state of the art in wound healing methods and compositions. This reference uses no more than about 1% autologous fibroblasts.
